

MCC 2012 Chairs' Message

It is our pleasure to welcome you to the 1st edition of MCC, the Mobile Cloud Computing Workshop associated with SIGCOMM. We are happy to have this event in Europe, the home of much of the pioneering work on mobile social networks and mobile clouds.

The MCC workshop will feature a keynote speaker. John Crowcroft, internationally renowned authority in wireless and mobile computing, will deliver the keynote on mobile cloud computing focusing on the recent development of Personal Mobile Cloud named NyMoTe.

MCC will also host a panel on “Mobile Cloud Computing: Open the Pandora’s Box”. The panel will be formed by outstanding academic scholars and well-established industrial researchers in the area of mobile cloud computing. They will present their recent research results, and present their vision about the future of mobile cloud computing. Confirmed panelists include Dr. Fan Bai (General Motors), Dr. Kyu-Han Kim (HP research lab, USA) and Jörg Ott (Aalto University, Finland).

The workshop has a single track program comprising three sessions that offer selected papers in a broad range of mobile cloud computing topics – from mobile cloud architecture to mobile social networks, mobile cloud based sensing, and mobile cloud computing foundations, models, and applications. The main theme that emerges from these diverse contributions, and the main message to our attendees, is the coming together of different technologies, from low power sensor radios to ad hoc networks, mesh and cellular networks to enable integrated, pervasive mobile and cloud computing.

Many people, through various Committees, have helped in making this conference a success. To them goes our most sincere gratitude. In particular, our thanks to TPC members: Nath Badri, Paolo Bellavista, Thomas Michael Bohnert, Samia Bouzeffrane, Andrew T. Campbell, Marco Conti, Christophe Diot, Falko Dressler, Serge Fdida, Jeffrey R. Foerster, Silvia Giordano, Robert Greens, Myong Kang, Andreas Kessler, Robin Kravets, Jeongkeun Lee, Gerard LeLanne, Liviu Lftode, Huan Liu, Songwu Lu, Gregorio Martines, Peng Ning, Giovanni Pau, Guy Pujiolle, Marco Roccetti, James C. Ramming, Kishor S. Trivedi, Tianyi Xing, Cliff Wang, Lixia Zhang, Haojin Zhu.

We want to thank Tianyi Xing, the MCC workshop paper submission website master, and Liang Wang who helped us establish and maintain the workshop public website. Particularly, we would like to thank Gregorio Martines who helped us advertise the workshop to multiple mailing lists.

We are grateful to the SIGCOMM workshop chairs, Dina Katabi and Jitu Padhye, for making the MCC workshop possible, and acknowledge their continuous support and advice in the organizational details.

We are cordially inviting you to attend the outstanding MCC 2012 program and enjoy beautiful Helsinki in July.

Mario Gerla and Dijiang Huang
General Chairs, MCC, 2012
