

FIRA-21 Workshop Panel

Motivation

- 20 minutes : 10:10 to 10:30
- Our Panel
 - Stanislav Lange (NTNU)
 - David Lou (Huawei Research)
 - Xindi Hou (Beijing Jiangtong University) – via Zoom
 - Andrei Robachevsky (Internet Society)
- Moderator: Adrian Farrel (Old Dog Consulting)

Questions and Discussion

- What motivates ideas of changing the Internet Routing and Addressing?
- Questions for the panel
 - Is 5G really driving applications that demand changes to the IP routing and addressing system?
 - Is enhanced network QoS a long-term solution, or just a way leveraging marginal improvements in the short term?
 - Do we need a “killer application” to motivate change, or should we architect a new world and see what emerges to use the new systems?
 - What are the commercial motivators for operators to deploy new systems of routing and addressing?
- Interactions from the floor
 - Introduce yourselves
 - Ask specific questions about the presentations
 - Ask the panel general questions about the topic
 - State your opinions and reasons
