

# FIRA-21 Workshop Panel

## Architecture

- 27 minutes : 12:03 - 12:30
- Our Panel
  - Luis Miguel Contreras Murillo (Telefonica)
  - Andy Reid (BT)
  - Dirk Trossen (Huawei Technologies)
  - Mohammad Borhani (Linköping University)
- Moderator: Daniel King(Lancaster University)

# Questions and Discussion

- What motivates ideas of changes to the Internet Architecture?
- Questions for the panel
  - What is really driving changes to Internet Architecture, security, applications, services, economics?
  - Should we explore radically different, and even alternative designs to Internet Architecture?
  - Is there enough research on Internet Architecture, Routing and Addressing, if not, why?
  - Should we restrict ourselves to backwards-compatible and therefore incrementally deployable improvements?
- Interactions from the floor
  - Introduce yourselves
  - Ask specific questions about the presentations
  - Ask the panel general questions about the topic
  - State your opinions and reasons
